

Academic entrepreneurship is key to ensuring that research results generated by research-intensive universities such as NUS get translated and diffused to the marketplace. NUS Enterprise is responsible for promoting and facilitating academic entrepreneurship in NUS. The following workshop, jointly organized by NUS Enterprise and Faculty of Engineering on **26 February 2009**, aims to inform faculty members, research staff and students in the Faculty the various support that NUS Enterprise can provide to enhance academic entrepreneurship in NUS. All are cordially invited to attend the workshop and to the networking lunch that follows. Please see details below including registration contact information.

We look forward to seeing and interacting with you at the workshop.
