**Faculty Requirements for Students Admitted from AY2016**

The Faculty Requirements for B.Eng. students admitted in AY2016 include modules that aim to develop important abilities required of well-rounded engineers with professional maturity and include modules related to Critical Thinking & Writing (CTW), Communications and Engineering Ethics & Professionalism (EG2401 Engineering Professionalism).

The Faculty Requirements for B.Eng. students admitted in AY2016 are as follows:

- ES1531 Critical Thinking And Writing
- EG2401 Engineering Professionalism
- ES2331 Communicating Engineering

ES1531 Critical Thinking & Writing and ES2331 Communicating Engineering offered by the Centre for English Language Communication (CELC) would meet the CTW and Communications requirements.

ES1531, ES2331 & EG2401 must be read as essential modules (module type code 01). Students are strongly encouraged to read ES1531 (pre-requisite to EG2401) in their 1st year of study.

**Important Points to note:**

1. Students in University Town College Programme (UTCP) will be reading UTW1001% and UTW2001% modules to fulfil UTCP requirements. UTCP students do not need to read ES1531 but they must read ES2331 to fulfil BEng Programme requirements.

2. Students in Ridge View Residential College (RVRC) will be reading ES1601 to fulfil RVRC requirements, which are also in lieu of both ES1531 & ES2331. RVRC students must read an additional UE module to make up for 4 more MCs.

3. Students who qualify & notified to read the advanced ES1501X (e.g. ES1501A, ES1501C) can read this module in lieu of both ES1531 & ES2331. However, they must read an additional UE module to make up for 4 more MCs.

4. Students in UTCP / RVRC / CEG / USP should refer to their respective program website for details on their Writing and Communications module requirements. Students who drop out of UTCP/RVRC/USP programs may need to read ES1531 and/or ES2331, hence please seek the advice of Faculty for further details to ensure you have fulfilled graduation requirements.
