Faculty Requirements for Students Admitted from AY2017

The Faculty Requirements for B.Eng. students admitted in AY2017 include modules that aim to develop important abilities required of well-rounded engineers with professional maturity and include modules related to Critical Thinking & Writing (ES1531) and Engineering Ethics & Professionalism (EG2401 Engineering Professionalism).

The Faculty Requirements for B.Eng. students admitted in AY2017 are as follows:

- ES1531 Critical Thinking And Writing (offered by Centre for English Language Communication (CELC))
- EG2401 Engineering Professionalism

ES1531 & EG2401 must be read as essential modules (module type code 01). Students are strongly encouraged to read ES1531 (pre-requisite to EG2401) in their 2nd year of study.

Important Points to note:

1. Students in University Town College Programme (UTCP) will be reading UTW1001% and UTW2001% modules to fulfil UTCP requirements. UTCP students do not need to read ES1531 to fulfil BEng Programme requirements. UTCP students must read an additional UE module to make up for 4 more MCs.

2. Students in Ridge View Residential College (RVRC) will be reading ES1601 to fulfil RVRC requirements, which are also in lieu of ES1531. RVRC students must read an additional UE module to make up for 4 more MCs.

3. Students in UTCP / RVRC / CEG / USP should refer to their respective program website for details on their Writing and Communications module requirements. Students who drop out of UTCP/RVRC/USP programs may need to read ES1531, hence please seek the advice of Faculty for further details to ensure you have fulfilled graduation requirements.
